DETAILED ACTION

In response to Appeal Brief filed 12/29/2008. Claims 1-15 are allowed

Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Allowable Subject Matter

The prior art made of record:

- | | | |
|---------------------|---------|------------------|
| ➤ US 6546393B1 | Khan | Filed 10/07/1999 |
| ➤ US 5761436A | Nielsen | Filed 07/01/1996 |
| ➤ US 20030080986 A1 | Baird | Filed 11/01/2001 |

❖ Claim(s) 1-15, are allowed:

The following is a statement of reasons for the indication of allowable subject matter:

Interpreting the claims in light of the specification, Examiner finds the claimed invention is patentably distinct from the prior art of record, which set forth in the followings:

Art Unit: 2176

- Khan teaches a method for generating a prioritized network site directory. Khan's method allows users who want to include their bookmarks into categories in a Website directory has to register with an online bookmark management service and import their browser bookmarks or favorite links onto an existing webpage or create a fresh set of bookmarks in their server- based bookmarks account. Once a user has a server side bookmark account set up and populated, the user may add part or all of the user's bookmarks to the Website directory. When adding the bookmarks into the site directory, the user is given the option to manually put each bookmark into a category or have the bookmarks be automatically categorized into the Website directory at figures Fig .4-5 and Col. 13, Lines 25-35.

- Nielsen teaches a method for providing to a user of a hypertext system an enhanced history presentation that allows the user to more quickly find and reference previously viewed hypernodes. According to Nielsen, a history list is used in Web browsers to provide a mechanism by which a user can recall hypernodes (i.e., Web pages) that have been previously accessed by the user, at figure Fig. 5 and Col. 7, Lines 40-55.

Art Unit: 2176

- Baird teaches a method for network navigation that enables automatic accessing and display in a bookmark list of at least one group of bookmarks stored on a remote computer system. A group indicator associated with at least one bookmark group that includes a number of group-associated bookmarks maintained on a remote computer system is displayed. When a user selects an action directed toward the group indicator, a locator for the group-associated bookmarks is accessed. Once the locator for the group-associated bookmarks is accessed, a number of bookmarks are displayed. Each of the bookmarks is associated with a respective one of the group-associated bookmarks. This is generally disclosed at paragraph(s) 41-49 of Baird.

Under the broadest reasonable interpretation of the claimed limitation which is consistent with the Applicant's Specification. The prior art cited above fails to teach all of the Applicant's claimed limitation. In particular, the claimed invention advantageously provides a finer level of detail that enables Web pages bookmarks on a server highlighted, if the user has already bookmarked [see the currently Appeal Brief claim(s) 1, 4, 7, 10 and 13-15 and the Applicant's disclosure at Page 22 Lines 10-16 and further in view of the Appeal Brief at page 10 the fourth paragraph.]

The Examiner asserts that the claims overcome the prior art of record as

Art Unit: 2176

describes above when the limitations are read in combination with the respective claimed limitations in their entirety.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quoc A. Tran whose telephone number is 571-272-8664. The examiner can normally be reached on Mon through Fri 8AM - 5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Doug Hutton can be reached on (571)272-4137. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
